# ...CmStick including many security functions

# www.CodeMeter.com...definitely attractive prices...

## Password Manager

In the CmStick all passwords, PINs and TANs can be stored in a simple and secure manner, within self-defined categories. The passwords are then of course mobile and easily accessible.

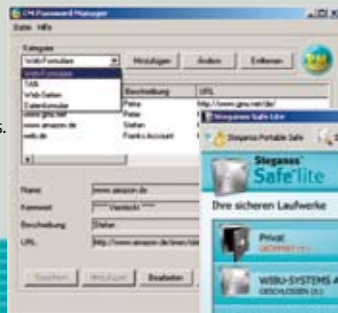

You can use the Autofill function in the Internet Explorer and Firefox safe in the knowledge that your passwords will be available via the CodeMeter Password Manager directly. The URL verification is an effective protection against phishing attacks.

You can use the CodeMeter Password Generator for an easy way to create passwords.

The CodeMeter Password Manager runs on Windows, Linux and Mac OS X.

## Protected files

With Steganos Safe Lite, you can store your data encrypted in a virtual 128 MB drive. The CodeMeter Edition offers you additional storage capacity up to 64 GB of data.

## Huge flash disk

The extended memory versions of the CmStick/M expand the CodeMeter chip with a flash disk with a capacity up to 2 GByte.

The flash disk allows you to store any data in the CmStick so that it can be used anywhere. It is even possible to store software on a CmStick/M.

The tool "CmDisk Configuration" allows you to partition the flash disk of your CmStick/M.

It runs on the common operating systems Windows, Linux and Mac OS X and the interfaces USB 2.0 and USB 1.1. are supported. und USB 1.1.

## Secure PC login

The secure PC login on Windows 2000 and Windows XP via SecuriKey Lite and the CmStick provides you with a secure 2 factor authentication.

## Software with a discount of 50 %

Purchase your software via www.codemeter.com and you can save up to 50 % of the recommended retail price.

Visit the CodeMeter shop in the Internet. There you will find many low cost software offers of well-known manufacturers.

All CmSticks are available with:

- CmStick/M
- One CD with the software: CodeMeter Password Manager, Steganos Safe Lite and SecuriKey Lite
- Manual
- Neck strap
- Aluminium case
