...CM-Stick including many security functions

CM Password Manager

In the CM-Stick all passwords, PINs and TANs can be stored in a simple and secure manner, within self-defined categories. The passwords are then of course mobile and easily accessible.

You can use the Autofill function in the Internet Explorer and Firefox safe in the knowledge that your passwords will be available via the CM Password Manager directly. The URL verification is an effective protection against phishing attacks.

You can use the CM Password Generator for an easy way to create passwords.

The CM Password Manager runs on Windows, Linux and Mac OS X.

Protected files

With Steganos Safe Lite, you can store your data encrypted in a virtual 128 MB drive. The CodeMeter Edition offers you additional storage capacity up to 64 GB of data.

Secure PC login

The secure PC login on Windows 2000 and Windows XP via SecuriKey Lite and the CM-Stick provides you with a secure 2 factor authentication.

Huge flash disk

The extended memory versions of the CM-Stick/M expand the CodeMeter chip with a flash disk with a capacity up to 2 GByte.

The flash disk allows you to store any data in the CM-Stick so that it can be used anywhere. It is even possible to store software on a CM-Stick/M.

The tool "CM Disk Configuration" allows you to partition the flash disk of your CM-Stick/M.

It runs on the common operating systems Windows, Linux and Mac OS X and the interfaces USB 2.0 and USB 1.1. are supported.

www.CodeMeter.com...definitely attractive prices...
